

## Celsius Evaporative cooling for MIRA Data Centre

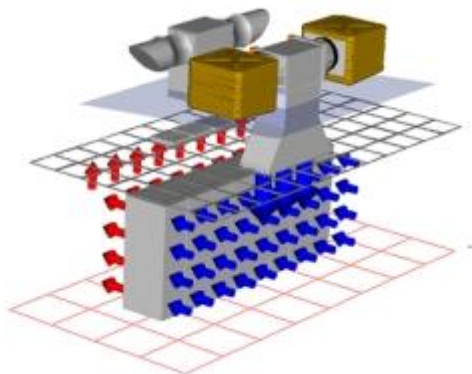

The Motor Industry Research Association (MIRA) have installed a Celsius EcoCooling Evaporative cooling system in their main Data Centre at their headquarters in Nuneaton.

The Data Centre was previously cooled using a combination of refrigeration based air conditioning, the Celsius system consumes less than 10% of the present load within the area, saving thousands of tonnes of carbon per annum.

The system consists of one Celsius cooler and a Celsius extraction system to balance the airflow through the area. The area is kept cool using a wall mounted thermostat and is fully automatic.

*"Keeping people comfortable without costing the earth"*
