

## AIR CONDITIONING FOR SIEMENS

To keep the Siemens three storey office block in Banbury, cool we have installed a centrally controlled Fujitsu air conditioning system.

The system consists of 24 no. internal ceiling and wall mounted units, linked to external roof top mounted condensing units.

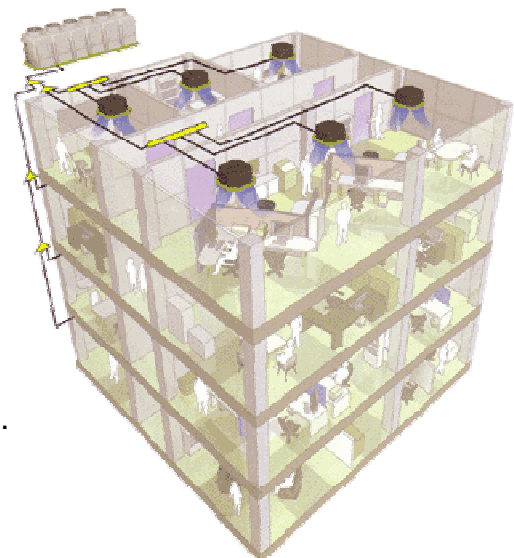

The system has a built in time-clock function to allow the system to operate fully automatically.

Celsius undertook all installation work, including builders work and full commissioning in a 3 week timescale.

The system was fitted during a general office refurbishment, the contract was completed on time and within budget.

Ulrich Mienhart the contracts manager for Siemens described the Celsius element as "A job well done with a minimum of fuss and disruption".

We have since installed several other system on site for Siemens in other areas, including further air conditioning and general ventilation and cooling for the shopfloor area of the works.

*"Exceeding customer's expectations"*
