

WARWICK HOSPITAL JOINS THE GREEN ECOCOOLING REVOLUTION

Warwick hospital have installed an EcoCooling system in their on site Data centre. The system replaces the 4 no. 10KW split air conditioning units currently used, each of these has a 32 amp electrical feed, compared to the 16 amp feed to the new EcoCooling system, this results in a saving to the hospital of over 90% on their current electricity bills.

This equates to a saving of over 50 tonnes of carbon, going some way to meeting their Carbon Reduction targets.
