

## GO OUTDOORS GOES GREEN

When the Go Outdoors store in Taunton overheated during the summer months they contacted Celsius for a solution.

The solution had to be cost effective both for installation and also for on-going running costs. Go Outdoors also wanted to minimise their carbon footprint.

The solution was a system of 4 EcoCoolers and 4 no. Celsius extraction units, the extraction units are controlled from the EcoCoolers and a unique low level control system incorporating thermostats and multi-channel timeclock, allowing the system to be setup to maximise free cooling at night when electricity costs are lower and external temperatures are at their lowest.

Each EcoCooler in this application is estimated to save over £2,600.00 per annum and over 12 tonnes of Carbon per annum when compared to a comparable air conditioning system.

Celsius undertook the complete installation including power and water supplies to all four EcoCoolers whilst the store was open and the whole installation took only 2 weeks.
