ECOCOOLING COOLS THE GYM AT TELFORDS LATEST LEISURE CENTRE AT NEWPORT

Telford's newest leisure centre uses an EcoCooling system to provide low carbon cooling to the gym area.

After using Celsius EcoCooling successfully at their Wellington Leisure centre and their new school at the Abraham Darby Centre they approached Celsius to design them an EcoCooling system for the new gym at Newport.

The system also incorporates significant attenuation to provide cool quiet low carbon cooling to the area. Providing 35KW of cooling to the area for the use of only 1.7KW of electricity.

The system is connected into the centres Building Management system (BMS) thus providing fully automatic control. Celsius supplied and installed the system with all builders work, electrical wiring, water pipework and access equipment.
