

LEADING THERMOFORMING COMPANY OPT FOR ECOCOOLING SYSTEM

When Thermoform Limited wanted to replace their old ineffective Breezair cooling system they looked to Celsius to provide a more effective solution.

Celsius recommended and installed 3 no. EcoCooling wall mounted evaporative cooling units, each EcoCooling unit provides 35% more fresh cool air than the Breezair units and thus far more cooling for the warm shopfloor.

As part of the same project Celsius removed the old inefficient Roof mounted Breezair system and fully weathered the resulting holes.

Denis Fitzgerald, General Site Manager of Thermoform said of the Celsius installation team,

Celsius Removed the old system at the same time they worked around our production requirements. Ian and Joe were a pleasure to work with".

"Just wanted you to thank the lads for their efforts over the last week in very difficult weather conditions. Nothing was too much trouble and
