

AWARD WINNING FIRE MANUFACTURER CONTACTS CELSIUS TO TACKLE HIGH TEMPERATURES

Evonic Fires, a British based electric fire manufacturer had previously been suffering from high summertime temperatures at their head office, based in Stratford Upon Avon.

A local air-conditioning company were first contacted to deliver a suitable cooling solution, however failed after being unable to meet specific installation requirements and deadlines, Celsius Design were then contacted.

powerful wall mounted units, rated 4KW each.

Celsius installed 5 wall mounted air – conditioning units rated at 3KW each, 2 ceiling cassettes at 5.6KW and 2 slightly more

All units were installed successfully, meeting the specific installation requirements, where other professionals could not.

All work was undertaken during normal working hours with zero interruptions to Evonic Fires day to day working operations.
