

## **ECOCOOLING USED TO COOL SPECIALIST FLAGMAKING WORKSHOP**

Specialised Canvas are the UK's trusted experts in bespoke flags and flagpole solutions, their premium quality flags have adorned some of the finest locations in the world, from government offices and embassies to luxury hotels and retail stores.

The specialist workshop, based in Chesterfield, previously suffered from high summertime temperatures on their mezzanine floors. With no existing cooling system in place and with numerous overhead natural rooflights, each building was effectively acting like a big greenhouse.

Celsius were contacted and granted the opportunity to provide a suitable cooling solution to tackle the overheating problem.

Celsius installed 3 EcoCooling evaporative cooling units, each unit provides up to 35KW, creating a combined cooling capacity of over 100KW.

The new EcoCooling system managed to drastically reduce the temperatures and create a far more comfortable working environment above the mezzanines.

“Celsius installed all the EcoCooling systems during normal trading hours with no downtime or disruption. The systems work very well and have vastly improved conditions on the mezz floors for our staff”

**Sam Bramah, Sales Manager at Specialised Canvas Services**
